BMW PROFESSIONAL DRIVER SAFETY TRAINING.

As a professional driver, you have a special responsibility for your passengers. Professional Driver Safety Training is specifically designed to address these high standards and allows you to lay the foundations for supremely confident handling of your car in everyday driving and in special situations. The ability to react perfectly under pressure is what makes an expert. The correct seating position, holding the steering wheel correctly, emergency braking and evasive manoeuvres form the basis for handling your car with supreme confidence in everyday driving and special situations. However, what happens when you are forced to flee or to pursue someone, for example? How do you maintain perfect control of a vehicle at high speeds? Specially trained BMW instructors coach the participants in such aspects as demanding, high-speed manoeuvres on the circuit.
